Discussion Paper spheric photolabile iodine content is obtained by measuring the iodine atoms evolved when ambient air is subject to broadband UV-visible photolysis.

ACP - FAQs

ACPD 14, C102–C106, 2014 Interactive Comment Full Screen / Esc Printer-friendly Version Interactive Discussion Discussion Paper driven by a few outliers, which is underlined by the low correlation coefficients. In general, it would be better to show squared correlation coefficients within the entire paper.

Interactive review process - Atmospheric Chemistry and Physics

The discussion paper stays online but the reader is notified about the withdrawal. Retraction : authors or, in specific cases, editors can decide to formally withdraw a published journal article. The article stays online but the reader is notified about the retraction.

Interactive comment on “N O release from by - ACPD

Atmospheric Chemistry and Physics (ACP) is a not-for-profit international scientific journal dedicated to the publication and public discussion of high-quality studies investigating the Earth's atmosphere and the underlying chemical and physical processes.

by C. Hoose and O. Möhler - atmos-chem-phys-discuss.net

Discussion papers posted in ACPD remain permanently archived, citable, and publicly accessible and therefore cannot be removed. This approach has been chosen for a number of practical and conceptual reasons, and it has proven to be beneficial for scientific communication and quality assurance as explained above.
