Build Your Own Wooden Plane. - The English Woodworker

Beech is a traditional wood for planemaking, but it's even less stable than maple. Goncalvo Alves is an excellent wood for making a plane, and so are apple, pear, and hornbeam. I have used cherry, ash, oak, and birch - but in each case added a separate sole of rosewood or pau ferro (morado).

How To Build 3 Basic Hand Planes - Popular Mechanics

In this article, I will show you how to build a bevel-up high-angle plane in an afternoon. The main advantage of this bevel-up plane comes from the high cutting angle and tight mouth, which can cut difficult grain without tearing out. Changing the bevel angle on the iron changes the cutting angle making this plane adaptable.
