Engineering Thermodynamics Lecture Notes. Lack of Equilibrium (Mechanical,Thermal,Chemical) The lack of equilibrium between the system and the surroundings or between the two systems causes a spontaneous change which makes the process irreversible. Examples: 1. Heat transfer through a finite temperature difference.

Energy transformations - mostly involve heat and work movements. The Fundamental law is the conservation of energy principle: energy cannot be created or destroyed, but can only be transformed from one form to another.

Chapter 1 Introduction - Thermodynamics, Mechanical ...

Thermodynamics is both a branch of physics and an engineering science. The scientist is normally interested in gaining a fundamental understanding of the physical and chemical behavior of fixed, quiescent quantities of matter and uses the principles of thermodynamics to relate the properties of matter. Engineers are generally interested in studying
