## **How to Paint Acrylic Urethane | It Still Runs**

"Even single-stage urethane paints provide a deep paint finish without the expense." Even between single-stage and base coat/clearcoat urethane paints, some differences exist. Gary Stone, a former Vermont-based restorer, said he prefers single-stage paints for solid colors and base coat/clearcoat paints for metallics.

## **Automotive Paint On Furniture - Painted by Kayla Payne**

Urethane primers come in a standard and high-build variety. Urethane primers also have great filling qualities. Follow the instructions for mixing and flash times (dry times in between coats). Primer surfacers shrink when flash times (usually 5 to 10 mins) are ignored. Do not use a hardener meant for one product with a different product.

## **Omni® - PPG Refinish**

Eastwood Single Stage Urethane Paint. Eastwood's Single Stage Urethane Paints give you a great finish on your restoration project. They allow you to achieve color and gloss with a single product. With a 3:1 mix ratio (3 parts paint to 1 part activator), these paints are easy to mix and easy to apply.

## **Single Stage Urethane - Colors - Automotive Finishes ...**

For the color coat, I used Omni MTK acrylic urethane single stage. Single stage means that no clear coat is needed for the gloss sheen. The color coat is high gloss. This material is also mixed in a 4:1:1 ratio with a hardener and reducer. The original hardware on this piece is so good!

## **Omni System Selection Guide - PPG Refinish**

Omni AU MTK is a "value line" single stage urethane 2K (high gloss and build). Omni AE line has an acrylic enamel single stage called MAE that is an economical urethane will give a slightly better look. It is nastier than enamel but both use hardeners so you need a 3M vapor eye protection/vapor mask ...

## **Mtk Acrylic Urethane Single Stage Ppg Industries**

Two popular styles of acrylic urethane paints are common in the industry. The single stage acrylic urethane features a high gloss, high solid count product which does not require a clear finish top coat. The two-stage approach urethane features a low gloss, high solid counter product; which is a topcoat with a clear finish coat.

## **Acrylic vs. Urethane | Hemmings**

1) Acrylic enamel seems to be a thick (high viscosity) paint when compared to laquer and enamel. Is single stage urethane as thick as acrylic enamel? 2) 2 stage paint jobs require sanding, polishing and buffing before applying the clear coat and also
