It's a wonder any sites get done at all. Here are 10 problems with the way web projects are typically done. We've experienced all of these problems, but more importantly, we've figured out how to solve them. Problem 1: Everybody wants to know what it's going to cost. The way we used to work, we couldn't tell you what any given project would cost.

Solved: QUESTION 3 (Problem Set #5) In A Large University ...

Problem-based (or Enquiry/Inquiry-based) learning reverses the 'traditional' teaching approach: students are provided with a problem to solve, and then have to work out (usually in groups) which learning and research they need to engage with to solve the problem: this creates individual learning paths, with each group and student learning independently.
