The Contest Problem Book VI - MatikZone

There are 325 problems from the 13 contests included in this collection. A Problem Index at the back of the book classifies the problems into the following major subject areas: Algebra, Arithmetic, Complex Numbers, Counting, Functions, Geometry, Graphs, Logarithms, Logic, Number Theory, Polynomials, Probability, Sequences, Statistics, and Trigonometry.

Problem Books | Mathematical Association of America

But returning to the AHSME books that cover the contest from 1950 through 1982, with rare exceptions, the AHSME problems are rather easier than those that would be included in a Moscow City Olympiad. However, due to a more stringent time framework and a greater number of problems,...

The Contest Problem Book I-IV

Book description. This is the ninth book of problems and solutions from the American Mathematics Competitions (AMC) contests. It chronicles 325 problems from the 13 AMC 12 contests given in the years 2001 through 2007. The authors were the joint directors of the AMC 12 and AMC 10 competitions during that period.
