different values. Open source is a development methodology; free software is a social movement."

## **Understanding Open Source Software vs. Free Software**

Open-source license criteria focus on the availability of the source code and the ability to modify and share it, while free software and public domain focus on the user's freedom to use the program, to modify it, and to share it.

## **O'Reilly Books & Videos**

It covers all the common open source licenses, explaining what each section means, and digging into problems that might come up for the licensor or licensee. Open Source isn't all that it covers: standard shrink-wrap licenses are examined, as is Sun's Community Source License and Microsoft's "Shared Source Initiative".

### **Understanding Open Source and Free Software Licensing [Book]**

Free and open source licenses are a source of widespread confusion. Many people think they're all alike. They think a license lets them use software with no conditions attached. Both of these notions are seriously mistaken, and some businesses have found themselves on the losing end of lawsuits as a result.
